About Me

After my graduation in Civil Engineering at METU, I **gathered my courage to make the switch to software.** I dedicated all my free time to full-stack courses. After acquiring basic knowledge about the industry, I have moved on to specialize in Front-End development using the **ReactJS library**.

Currently, I am employed as a **Front-End Developer** at Inavitas, where we bring data analysis to life through visually **appealing and user-friendly tables and graphs using ReactJS, Javascript and Typescript**. In my free time, I stay current with industry advancements by **doing side projects and learning new technologies.**

I am eager for a challenging opportunity that allows me to utilize my skills and experience while offering opportunities for growth and advancement.

Experiences

Inavitas | Front-End Developer

September 2022 – Ongoing

- **Led the transformation** of our React application to a **micro front-end architecture**, ensuring alignment with updated designs. Achieved **100%** coverage of main features, decreased customer wait time by **35%**, and reduced build-time by **60%**.
- Covered core functionality by **unit and e2e tests**, resulting in a **30% reduction** in bug-related delays and a **20% increase** in overall code quality.
- Collaborated with industry leaders like TAB Gıda, Havelsan, and TEIAŞ on diverse projects including natural SCADA, Plant, and Business. Ensured **punctual delivery** of new features and played an **active role** in resolving bugs, resulting in a **20%** increase in **customer satisfaction**.
- Enhanced user engagement by maintaining and updating over **15 widgets** on the dashboard page, resulting in **25% boost** in overall dashboard usability.
- Worked with **scrum and agile development principles using JIRA** and collaborated with team members using Microsoft Teams.

Arina Digital | Front-End Developer

April 2022 – September 2022

- Developed the **entire front-end** of the **Teknik Card** project from scratch. This included developing a fully **responsive** website consisting **20 pages**.
- Achieved a **30% increase in user engagement** and a **25% decrease in bounce rate** by translating Figma designs into pixel-perfect and user-friendly web and mobile interfaces.
- Contributed to the renovation and development stages of Mbis and Klimasan projects, resulting in improved project outcomes and efficiencies.

Certifications

- **React** The Complete Guide **(50 hours)** || **Full-Stack Web Development** Bootcamp **(55 hours)** || **Data Structures and Algorithms (20 hours)** – Udemy
- Using Python to Access Web Data || Python Data Structures || Getting Started with Python – Coursera

Education

BC Civil engineering **METU** Sept 2016 – Aug 2021
- 🎓CGPA: **3.60/4.0** (5th/456)

Activities

Work and Travel
June 2019 – Sept 2019 Washington DC, USA

- Learned how to communicate with people with a different language and express myself in English better.
